Solutions for the HD Planet

Mvix DS Elite

Networked, Embedded Signage Player

- Low Cost, Networked, Embedded Signage**
Offering network-centric, signage solution targeted to the small and medium-size businesses. Adaptable to a variety of signage applications. Designed with Intel's leading edge 45nm Dual-Core processor, this player allows versatile digital signage applications at incredibly low cost.
- Low Power Consumption**
Combined with spectacular picture quality and crystal clear sound clarity, the Mvix DS Elite comes with an extremely low operational cost. It consumes no more than 40-70W (compared to a standard PC consuming 300-400W min). This significant reduction in power consumption and operational cost makes it the most environment friendly signage player!
- Small Form Factor Foot-Print**
Measuring almost the size of a textbook or a ream of paper, this 9" x 7" x 3" device makes ideally suitable for LCD displays. It can be VESA mounted or can be tucked behind the display screen with ease.
- Comprehensively Networked**
Equipped with Gigabit (10/100/1000) LAN ports ensures reliable (and redundant) network capabilities for Media Streaming, Remote controlling over network and Media acquisition. Wireless (802.11n) networking allows ease of installation, and eliminates the need for expensive, legacy, wired configurations.
- Interactive Touchscreen Mode**
Embedded Touchscreen module, enables usage in kiosks, in museums, digital product catalog showcases etc.
