

Mvix DS HDPPro

affordable, scalable, intuitive
networkable digital signage solution

- Web-Delivered Content
- Free! Web-based Software
- Web Feeds / Weather / RSS / Text
- Solid-State Storage

Features

- Full-HD Networkable Signage Controller w/ HDMI
- Built on Solid-state storage for high Reliability
- Weather Feeds / Twitter / Facebook feeds
- Pre-defined Grids and Zones
- RSS Feeds / Scrolling Text
- Display Web-pages, HTML Widgets
- Real-time device monitoring

Applications

- Fitness and Recreational Centers
- Banks and Credit Unions
- Hotels, Motels, and Cruises

Mvix DS HDPPro, a full-HD digital signage controller offering reliable signage playback via a state-of-the-art, signage campaign management system. Equipped with a centralized management platform, the DS HDPPro offers playback scheduling for weeks and months in advance.

It allows users to use pre-defined zones or grids (i.e. split screen) for an optimal use of communication space. HDPPro provides a robust platform to display videos, slide-shows, dynamic weather feeds, RSS news, HTML pages and widgets. Screens equipped with Mvix DS HDPPro can be mounted horizontally or vertically, allowing flexibility of display patterns. Built on a robust x86 architecture with solid-state storage, Mvix DS HDPPro is comprehensively networked.

Mvix DS HDPPro

hi-definition (1080p) digital signage player

Full 1080p Media Decoding Technology

Supports popular 1080p HD video playback of over a dozen video formats (including H.264, AVI, MPEG etc.) on HD LCD or Plasma display via HDMI interface. Embedded modules allow live URL/web-content streaming within split/grid screen templates. Built on the ATI/Nvidia's HD technology platform, it even supports DirectX®10 3D graphics.

Low Power Consumption

Combined with spectacular picture quality of HD video and crystal clear sound clarity of digital audio, the Mvix DS HDPPro comes with an extremely low operational cost. It consumes no more than 35-50W (compared to a standard PC consuming 300-400W min). This reduction in power consumption and operational cost makes it environment friendly!

Specifications

Model No	Mvix DS HDPPro (DS-200HD) HD Signage Player
Media Storage	32GB Solid State Storage (w/ high MTBF), optional upgrade: 64GB SSD.
Construction	Metal Casing with good ventilation and ease of use port
Chipset & Platform	Dual-Core 1.6Ghz Processor
Video Resolution	Supports 1080i / 1080p (Full-HD) playback
Wireless Network	Wireless-N 802.11n USB Adapter (optional upgrade)
Wired Network	1 x LAN RJ45 10/100/1000M Network Port
Expansion Port	4 x USB2.0 (Back Panel), 2 x USB2.0 (Front Panel)
Video Out	HDMI 1.3, DVI, VGA (supports LVDS)
Audio Out	6-Channel HD Audio CODEC with S/PDIF in and out
Power	External Power Adapter 65W (Compatible with 110/220v Input)
Application System	Proprietary Content Management Signage Application
Dimensions	9in x 7.5in x 2.5in, 4lbs
