Features

- Auto-start, Auto-play | Pre-scheduled
- No network / networking required
- Continuous playback of images and videos
- Ideal for: small cafes, offices, real-estate marketing
- Wired and Wireless (802.11n) networking

Pre-configured and Ready to Use

Mvix Elite is an ideal, low cost signage system with HDMI offering HD picture quality for educating and informing the audience. It is designed to operate in a stand-alone mode at single office locations, trade-show events, real-estate marketing and fast-food restaurants. No servers or software required. Setup includes daily start and stop times, with auto-boot and auto-playback.

Versatile Compatibility

Mvix Elite is compatible with a wide variety of media formats (JPEG, PNG, MP4, WebM, HTML5 etc) for a playlist of videos, images and web-pages. Simple setup for use on horizontal and vertical display screens. Simply design the content, upload it via USB, a Web-URL, or a remote file storage server.
